Why is Our Bridge to the Future Falling down?

Why is Capitalism Failing?

Why is Democracy Failing?

**Why a 21st Century Nuclear World War
is a Near Certainty?**

**How you can Build a Better Bridge
to a Peaceful and Sustainable Future!**

Why is Capitalism Failing?

1) Capitalism is all about production and consumption. Techno-Industrial Capitalist-Consumerism is spewing out climate changing mountains, rivers and oceans of non-biodegradable and toxic waste; depleting Earth's life support capacity. You have no future in that world!

2) Capitalism's "DNA" is about concentrating wealth for the "1%" at the expense of the "99%". From time to time this brings out the guillotines and the Bolsheviks. This is the crack of wealth inequality that leads to revolution, war and collapse of societies. You have no future in that.

Why is Democracy Failing?

1) The success of evolution from simple to complex is in great part due to the parallel evolution of self-organizing capacity of living systems to keep up with rising complexity. Democracy is an ancient Greek invention that has not had a meaningful update in recent times. Democracy's societal organizing capacity is failing to keep up with the rising complexities of life, politics and challenges of the 21st century. The result is defections away from democracy around the world. January 6, 2021 storming of the U.S. Capitol was a big crack in our democracy. You have no future in what will follow.

2) Democracy is failing the test of organic collaboration. Living society must be understood as a super organism. Its parts must collaborate like the organs of your body. The heart beats for the heart and for all the other organs, the lung breathes for the lung and for all the other organs and so on. In a sentence: *One for all and all for one without conflict.* If your organs had "democratic" opposition within your body, you would get sick and die. The Holigent Initiative proposes a better way — it is your choice.

Why a 21st Century Nuclear World War is a Near Certainty?

To understand that issue we need to go back millions of years into the evolutionary jungle where every critter was food for some other critter. Life or death decisions had to be made in split seconds. Fast reflexive action had greater survival value than slower thought process. This evolutionary legacy is preserved in the primitive parts of the human brain. 21st century humans will respond to high global socioeconomic stress through primitive “reptilian” action with diminished critical thought process.

Nuclear warfare began in World War II when the United States was the only nuclear power with two ready atom bombs; both dropped and detonated. Today the world has nine known nuclear powers with an estimated total of 45,000 nuclear weapons.

The rising social, political, economic and environmental stress on our conflicted and nuclear-armed planet elevates the probability of nuclear war. When you factor in that the perceived winning option in a nuclear conflict is first strike; the probability of nuclear war rises to near certainty.

In a nuclear world war the lucky ones will die instantly. The survivors will die a torturous slow death in a nuclear poisoned world.

How to Build a Better Bridge

to your

Peaceful and Sustainable Future

Plan A

Where ever you live, form a group of 5 or more individuals. Reproduce these boards and perform this show and tell act.

Plan B

- 1) Come live, learn and work in a Holigent House.
- 2) Prepare for the Road Trip across Europe to deliver hard copies of the Holigent Peace and Sustainability Initiative to the European Union in Brussels.
- 3) Be part of the team building a Holigent Village to demonstrate community retrofit/reconstruction compliant with nature's building and sustainability code.
- 4) Be part of the pioneering team building the Holigent Global Village — a permanent world exhibition — demonstrating societal reconstruction building a future of social, economic and environmental justice, quality and systemic sustainability.

Order the **Holigent Peace and Sustainability Initiative** from [amazon.com](https://www.amazon.com) (will be available in August 2021)

NOTES:

BBB performers lift each board out of a stack turn it toward the audience and read aloud the page.

Build a Better Bridge
to your peaceful and sustainable future

aka

Holigent BBB Movement

Our agenda is to receive donations from everyone who feels building a peaceful and sustainable future close to their heart: Family, Friends, Neighbors, Billionaires, Governments, the European Union, the United Nations.

When the money arrives, we purchase real property where the “Better Bridge Builders” can live, practice and promote the peaceful and sustainable life style that is compliant with Mother Nature’s Building and Sustainability Code, compressed into a sentence:

**Build by cellular construction
and organic collaboration,
one for all and all for one
doing the essential most
using the least of resources
with smiles and laughter
without conflict and without waste.**
